

## CLAIMS

REPLACEMENT  
ART 34 PCT

1. Image pick-up device, comprising:
  - a housing,
  - image storage means which are arranged in the housing for storing image data,
  - 5       - a first code which is associated with the image storage means for identification thereof,
  - a second code for locating the image data in a database.
2. Image pick-up device as claimed in claim 1,  
10 characterized in that it is suitable for once-only use.
3. Image pick-up device as claimed in claim 1 or 2, wherein the first code is associated with the image storage means.
4. Image pick-up device as claimed in claim 1 or 2,  
15 wherein the first code is associated with the housing.
5. Image pick-up device as claimed in one or more of the foregoing claims, wherein the second code is arranged on coding means such as a label which is adhered releasably to the housing.
- 20 6. Image pick-up device as claimed in one or more of the claims 1-4, wherein the second code is arranged on a packaging of the image pick-up device.
7. Image pick-up device as claimed in one or more of the claims 1-6, wherein the image storage means  
25 comprise a photographic film.
8. Image pick-up device as claimed in one or more of the claims 1-6, wherein the image storage means comprise digital storage means and the image pick-up device further comprises digital image pick-up means for  
30 recording image information.
9. System for making images available, comprising:

REPLACED BY  
ART 34 ANDT

- at least one first computer for inputting a second code and viewing the images,
- at least one second computer with at least one database for storing the images,

5       - at least one computer network for connecting the computers, wherein:

- the images are associated with a first code and the first code is the same as the second code or the second code is associated with the first code.

10       10. System as claimed in claim 9, comprising at least one image pick-up device as claimed in one or more of the claims 1-8, wherein the first code and the second code of the image pick-up device correspond with the first code and the second code in the database.

15       11. System as claimed in claim 9 or 10, wherein the first code is a field in the database.

12. System as claimed in one or more of the claims 9-11, wherein the second code comprises an internet address.

20       13. System as claimed in one or more of the foregoing claims, wherein at least one part of the second code can be searched for in a field in the database.

25       14. System as claimed in one or more of the claims 9-13, wherein the database is accessible via an internet site.

15. System as claimed in claim 14, wherein a part of the first code comprises an internet address (URL).

30       16. System as claimed in one or more of the claims 9-15, wherein a person can download images from the second computer to the first computer via the internet site.

35       17. System as claimed in one or more of the claims 9-15, wherein a person can order photo prints with the images via the internet site.

REPLACED BY  
ART 34 AMDT

18. Method for distributing images, comprising  
steps for:

- recording image data in image storage means of an  
image pick-up device for once-only use, which data are  
5 associated with a first code for identification of the  
image data,
- removing or taking over a second code from the  
housing,
- transferring the image data from the image  
10 storage means to a database together with the first code  
with which the image data are associated,
- making a connection to the database using a  
computer and retrieving the image data on the basis of a  
second code, wherein:
- 15 - the images are associated with the first code and  
the first code is the same as the second code or the  
second code is associated with the first code.

19. Method as claimed in claim 18, further  
comprising steps for selecting desired images,

- 20 - printing the selected images,
- sending the printed images.
